

VRECAST WALL AND FLOOR SYSTEM

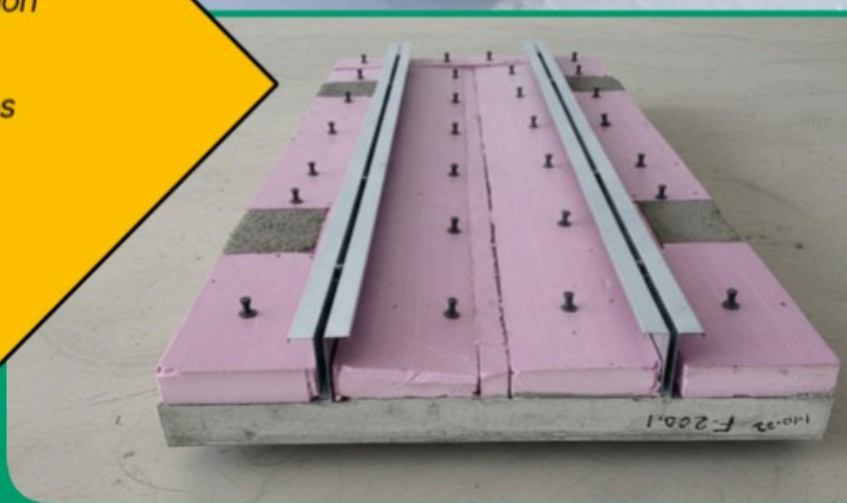

Engineered for Excellence

Unlike traditional construction systems, Vreecast products are engineered for modern performance demands:

- ✓ High-thermal Efficiency
- ✓ Non-combustible, high-resilient smart solution
- ✓ Light-weight Structural Products
- ✓ Wide variety of Exterior Architectural Finishes
- ✓ Accelerated Construction timelines
- ✓ Cost-Effective Manufacturing

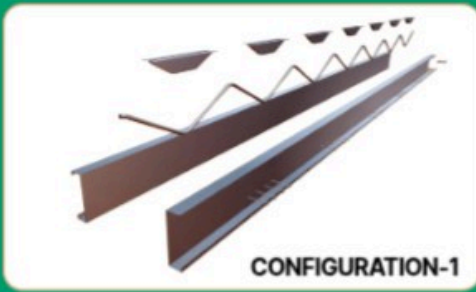

This patented panel system is lighter than traditional precast—yet delivers superior structural integrity. Quicker installation. Reliable performance. Sustainable results.

Two proven configurations designed for superior performance, streamlined assembly, and complete component availability. Both systems feature factory-precision manufacturing, efficient on-site or off-site assembly, and full parts availability through our local distribution network.

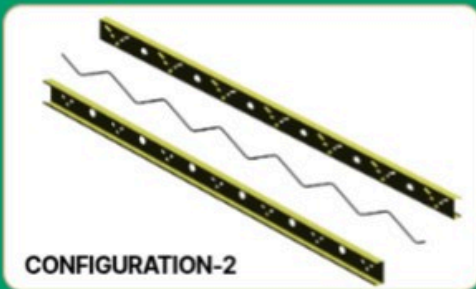

OUR VISION:

To deliver the most cost-effective, highly resilient, and architecturally pleasing exterior finishes with high thermal performance exceeding minimum requirements, while taking a smart step forward toward achieving net-zero carbon emissions in certain application of constructions through our patented system.

CONFIGURATION-1

CONFIGURATION-2

APPLICATIONS:

- Architectural Cladding
- Structural VREcast Wall Panels
- Structural VREcast Floor Panels
- Cast-in-place VREcast Walls Cladding
- Cast-in-place VREcast Floors
- Total VREcast System
- Modular VREcast System
